# Minimal Gallery

Pros	Cons
Easily scrollable	images fail to brighten
stretching to fit site size	vibrant, should blend into - <del>match</del> color palette
minimalistic uses dead space and vibrant images	Bland / themeless - keep aesthetic true
uses videos + images	Nav is solid button
click buttons + links for	↳ <u>Icons</u> - CSS heavy scroll effects
Header / footer	

Header CSS Header/scroll effects  
Footer images/videos Color Pallet  
Nav Minimalistic theme  
easily scrollable but uninteresting

# Elements to include / omit

Header/footer + Nav on every page as seen in modern design. Nav scroll to site location

Minimalism - but with a color pallet and theme, keeping segments in fact + context

Welcome image/video.

Gallery + Blurb section

How / scroll CSS?  
flexible / responsive

# Site Anlyzation APPealizing Elements

Small site, basic scroll with video welcome, bios and gallery on main page. Header/footer can be found on each page with header having included in footer. Header is black, looks abstract, firm and displays back end of deck space mixed with content. No CSS or interactive components. flexible but overall vibrant + Hard to look at

Header + footer on every page  
New in Header - maybe Back-to-top button?  
Welcome video timer  
Synthetic footer implementation  
fit to Site size  
header X  
Hard/scroll Components  
Minimalistic  
welcome to site main page area ex.: about, gallery...  
Easy scroll down content  
head color palette  
Header/scroll Components

# Reasons to Pick Site

Minamal Gallery display out of my three site choices the use of less is more but does not meet / user perfect. I feel this will give me more of an idea where and when it's most impactful to use interactive or extended CSS controls. I also feel it will give an application for design and the control, giving me an idea of what to include as a feature / theme and how to better use it.

AUTOMATICALLY DISPATCHED WITHIN 2 WEEKS

- Clicking image takes me to the Art Page
- Good for viewing Art, I would prefer it making only my page + displaying single art more. Also display Art/contact on side - carries complications according to the fact contact on - no have interaction
- site content practice content flexes / Stays fixed by stacking + shrinking - content is now less flexible

# MINIMAL GALLERY

Welcome to the Minimal Gallery, a place for a diverse range of talented local artists to showcase their work both in the physical and virtual form. A space where a collection of unique pieces can simply speak for themselves.

The physical gallery is located at the Minimal Design HQ in stunning Wanaka on 58 McDougall Street, where locals and visitors alike can experience the art first hand. Here, in our virtual gallery, one can delve deeper into the collection, view more artists and connect with them across their social platforms.
